G-Tape

JOIST & BEARER PROTECTION TAPE

G-Tape is a joist and bearer protection tape that extends the life of your deck and prevents wood rot.

- Used by deck builders in America & Australia.
- Tears easily by hand.
- Sticks to tough surfaces in extreme environments.
- Easy to unstick and re-position.
- Protects joists and bearers from rot and decay.

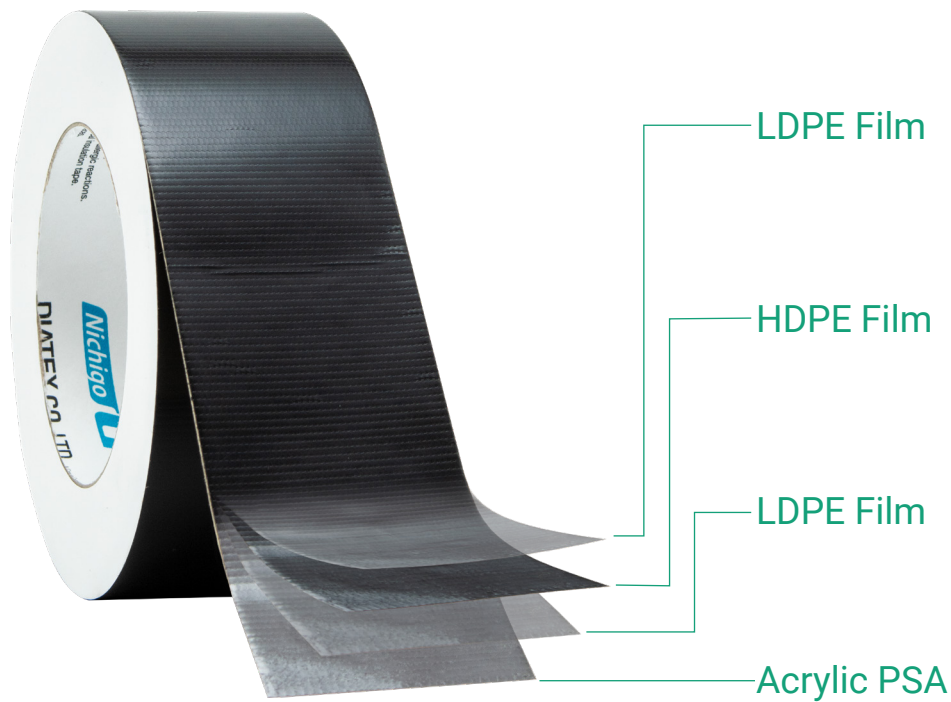

Application

G-Tape forms a water-tight seal, protecting your joists and bearers from all round moisture.

G-Tape

G-Tape uses an acrylic adhesive and woven cloth substrate. Providing high adhesion strength, is repositionable and leaves no sticky residue.

Features

- Tears easily, no tools required
- High adhesion strength
- No primer required
- Withstands temperatures from -40°C to 93°C
- Easy to remove and reposition
- Doesn't stick to itself, perfect for high wind situations
- 50 - 70% lighter than conventional flashing tapes
