

SUBMERSIBLE

JX-400S

Effluent and drainage water pump

Application

Suitable for carrying waste water and effluent the JX-400S is based on the vortex principle, and has a genuine non-clog impeller design.

NOT SUITABLE FOR HUMAN WASTE ONLY DAIRY AND SHEEP EFFLUENT

Design Features

- Built-in overload protection
- Stainless steel heat treated shaft with double seals in oil chamber
- Corrosion resistant cover and pump housing
- Stainless steel motor housing suction cover and screws
- Potted leads sealed with epoxy resin
- Fully automatic level control

Technical Data

Model	JX-400S	Weight (kg)	18
Motor (kW / HP)	0.45 / 0.6	Outlet (mm)	50
Power (Volts / Phase)	230 – 240/1	Full Load Current (A)	3 amps
Pump Dimension (mm)	500(H) x 225(W)	Min Sump Dimension (mm)	700 x 700 x 700

Pump Performance
