

MAXI SUB-1500 Domestic Submersible multistage automatic clean water pressure pump.

APPLICATION

Submersible pressure pump suitable for automatic domestic clean water supply to taps on demand, from above /underground water tank. **Not suitable** for water with solids like grit, sand, gravel, stone, etc. **Not suitable** for any other liquid apart from clean water with maximum water temp of 35 deg. C.

DESIGN FEATURES

- Max head **50m**, Max flow **95lpm**. Submersible grade motor.
- Pump **must be installed on raised surface**. Max submergence 8m.
- Built-In advanced electronic control for **auto start/stop** of pump.
- Constant pressure at running flow. No pressure fluctuations.
- **Highest tap outlet to be less than 18m above pump location**.
- 15m long power cable with NZ standard 3 pin plug.
- Heavy duty capacitor and bearings for reliable operation.
- Built-in run-dry & delivery side leakage protection.
- **Double Mech Seal + lip seal** protects water ingress in motor.
- Supplied **with 5L SS pressure tank & inlet strainer assembly**.
- **Floating suction available**. Please ask **Wallace** for extra cost.

5 litre SS pressure tank supplied loose, **MUST** be installed in delivery pipe but before **FIRST** outlet.

Indicative photo of Floating suction ask Wallace for extra cost.

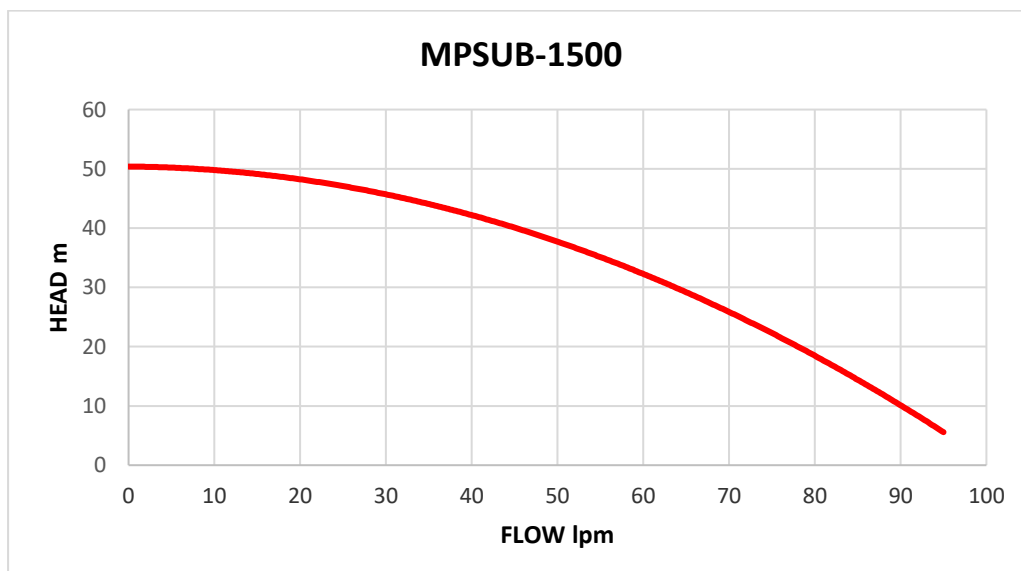

TECHNICAL DATA

Model / Part #	kW / HP	Volts/Phase	Discharge size	FLC	Cable	Power Supply
MPSUB-1500	1.2 / 1.6	230 /1 Ph	1" (25mm)	5.5 amps	15 M	230V/1Ph/10A

DIMENSIONS

Model / Part #	Height	Max Width	Body DIA	Weight
MPSUB-1500	529mm	310mm	186mm	12.6kg

NOTE: The above Performance graph is measured at pump outlet and based on factory test conditions. Actual performance onsite may differ due to piping and fixture sizing and layout
