

# PROSIL 10

Prosil 10 is designed for general purpose glazing, industrial, and automotive sealing applications where excellent adhesion and long term reliability are required. It reacts with atmospheric moisture to produce a form in place silicone rubber seal.

- Weather and UV Resistant
- 5-8 minute skin time
- Low Slump
- Does not corrode metals
- Movement capability + 25%
- Operating Temperature range of -60°C to 180°C
- AS 4020/ISO 11600 approved

Code	Description	MOQ Box Qty
PROSIL10	100% Neutral Cure Silicone (300ml)	20

## Silicone Application for Dektites

For adequate bonding all surfaces must be clean and dry.

1. The base of the Dektite should be moulded by hand to form a snug fit to the roof profile.
2. Apply a continuous bead of neutral cure 100% silicone to the underside of the Dektite.
3. For an effective seal, sandwich a 1-3mm bead of silicone between Dektite and surface.
4. Fit Dektite to sit snugly on the roof profile.
5. Fasten with washered screws/Hex screws (NB: Screw coatings of class 4 or 5 are required), or rivets.
6. Remove excess silicone and collect any swarf.
